1 Mission

The spatial data services working group supports the European Commission for the definition and refinement of the technical and organizational elements required for the development of the draft Implementing Rules for the spatial data services through the provision of recommendations.

2 Objectives

- To Detail the definition and the scope of the Spatial Data Services
- To Refine the scope and the priorities of the Spatial Data Services Implementing Rules
- To Refine the Spatial Data Services' Implementing Rules development process

3 Approach

- Decisions are taken through a consensus building process
- The Working Group appoints a chair/Substitute to coordinate the consensus building process
- The Working Group defines its decision and document editing process
- All decisions and choices will be documented in appropriate documents for ultimately public availability
- The Working Group defines the consultation process for the relevant documentation taking into account the current INSPIRE review process.

4 Deliverables

Documented decisions and recommendations

5 Time line

From October 2010 to June 2011

The time line was extended to care for the wider consultation of the INSPIRE stakeholders not foreseen in version 1.0 of the working group terms of reference
