TN-ITS Exchange Infrastructure (Rosatte specifications)

Data chain in place with Swedish Trafikverket
Benefits for TN-ITS Map Provider

Deploying ‘ROSATTE spec’ Data Chain

• Faster updating of map (source)
• Increase quality of updates (confidence)
• Single technical interface saves development effort & reduces risk
• Contract simplification (re-use, non-exclusivity, liability, …)
TakeAways

• TomTom has invested in an advanced map platform to deliver the freshest map to the end application/user

• Collecting ITS road data from authorities for map maintenance is already in place & benefits are clear, large scale adoption is desired!

• TomTom is supportive of all initiatives that stimulate the deployment of a ROSATTE infrastructure in EU
