The smeSpire training offer based on Vocational Training Curricula for INSPIRE

Posted on 2-30-2014 by Smespire

The smeSpire training platform contains modules which can be used by the smeSpire network members in a very flexible way, coherently with the vocational training curricula developed by smeSpire, based on a series of Job Profiles and Business Processes related to INSPIRE implementations.

Access our training platform and follow the modules corresponding to the learning paths suggested by smeSpire for the three Job Profiles identified, or, alternatively, build your own self-customised learning path which best fills in your knowledge gaps, selecting the modules in the list.

Available modules:

- Introduction to INSPIRE
- INSPIRE advanced
- Introduction to costs/benefits of INSPIRE & possible opportunities
- Introduction overview of Technological Geospatial Trends and potential opportunities/benefits for the geo-ICT market
- Basics of INSPIRE Data and service sharing
- Basics of INSPIRE Data Specifications
- INSPIRE Data specifications advanced
- Procedures for Data and Metadata Harmonization

INSPIRE Conference 2014: INSPIRE for good governance

June 16 - 20
Aalborg, Denmark

16-20 June 2014, Aalborg, Denmark Seven years have passed since INSPIRE was adopted as the EU’s legal framework establishing the infrastructure for spatial information in Europe serving policies and activities having an impact on the environment. During this period the framework of technical specifications necessary to underpin an interoperable infrastructure has been completed, and a major effort has taken place to implement the Directive in the Member States. It is now time for the mid-term evaluation to assess how well it has worked.

INSPIRE Conference, Aalborg (Denmark), 16 June 2014
Join us, smeSpire is a network open to any interested stakeholder

Are you a geo-ICT SME?

We kindly invite you to become member of the smeSpire network.

This is a great opportunity to promote your business, advertise your skills and get in touch with other geo-ICT stakeholders, in order to enlarge your market in Europe.

Not a SME? Join us anyway!

We want to extend our Community beyond GeoICT Small and medium Enterprises: Public Authorities, Agencies, Universities, large companies and even individuals are also kindly invited to be part of the smeSpire Network and benefit from the project results.

Which are the benefits of a member of the smeSpire network?

✓ Be included in our smeSpire database: The largest publicly available, searchable and structured repository of information on the characteristics, activities and competencies of Geo-ICT stakeholders in Europe.
✓ Access our Training Platform: To acquire knowledge and skills on INSPIRE and all the related issues.
✓ Share your Best Practice: Insert in our catalogue your Best Practices in Geo-ICT and INSPIRE Implementations and share it within the network.
✓ Use additional smeSpire resources as soon as they will become available.
✓ Receive news and be informed about the project development.

Please fill out the form below and we will get back with you shortly.

FILL-IN THE ADHESION FORM

Thank you in advance for taking the time to complete this form. All the information will be handled according to the rules of the Data Protection Directive (95/46/EC) and national legislations.
smeSpire Network ADHESION form

Organisation/Institution/Name *

Street Name * 

City * 

Country * 

ZIP * 

Phone 

Email * 

Website (including http://)

The #smeSpire training offer based on Vocational Training Curricula for INSPIRE. Take a tour: smespire.eu/the-smespire-t...
The aim of this open group is to stimulate discussions supporting European geo-ICT SMEs to capitalize on the INSPIRE benefits.

- Description:
  smeSpire — A European Community of SMEs built on Environmental Digital Content and Languages, is an FP7 Support Action started in May 2012, funded by DG CONNECT of EC, run by a consortium of 15 partners from 12 EU Member States.
  The main project aim is to support geo-ICT European SMEs to capitalize the INSPIRE benefits, through 8 concrete outputs:

1. Assessment, in 12 EU Member States, of the market potential for geo-ICT SMEs in relation to INSPIRE as an integral component of the DAE, to characterise the obstacles for geo-ICT companies to enter this market in terms of knowledge gaps and training needs as defined within the project.
2. A training package based on vocational training curricula, designed to train environmental data analysis professional, expert in the maintenance and exploitation of environmental data commons. The training package, including a catalogue translated in all the official languages of the participating Member States, will be made available on an e-learning training platform.
3. A Best Practice catalogue, including lessons learned and successful outcomes, in the field of the management of environmental digital content across Europe.
4. Dissemination events, in the form of smeSpire days, which will include training workshops, to be organised in the 12 participating countries, potentially organised as ePractice workshops.
5. A network of SMEs and other institutional stakeholders aiming at bridging the gap between the INSPIRE-driven demand of environmental digital data and the industry-driven offer of geo-ICT solutions, stimulating, encouraging and facilitating the participation of SMEs.
6. A business model aiming at enabling already established and new geo-ICT SMEs in Europe to convert technological innovation which is inside the INSPIRE implementation process into economic value.
7. A database containing information about the geo-ICT SMEs in Europe, enabling complex business intelligence studies and analysis, even beyond the project lifetime, useful to extract real indicators and to map competences from SMEs across Europe.
8. General awareness about the importance of interoperability, about the EIS/EIP, and about relevant results from the ISA programme.

- Brief description: The aim of this open group is to stimulate discussions supporting European geo-ICT SMEs to capitalize the INSPIRE benefits.
