

Irene del Barrio
*European
Environment
Agency*

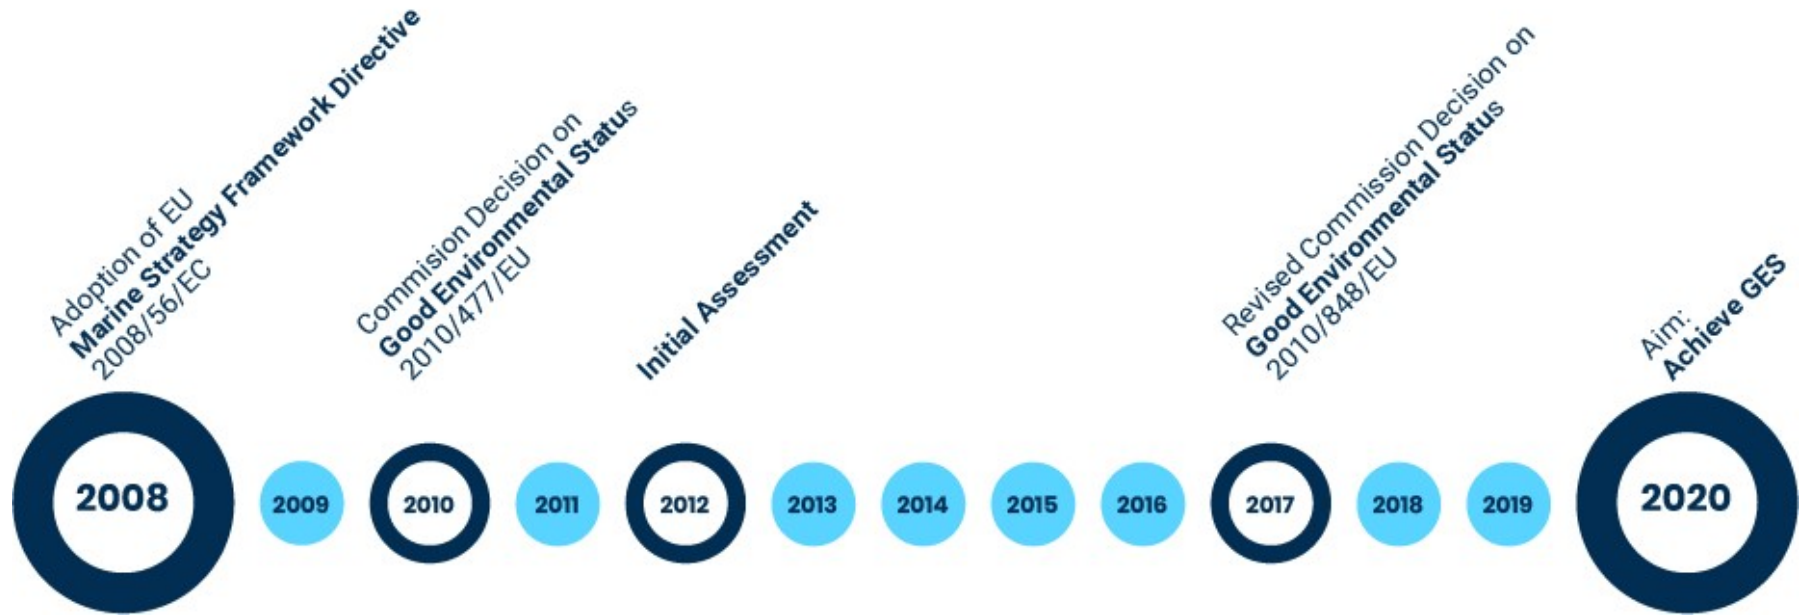

I am currently working at the EEA, where I give support to the European Commission in the reporting of the Marine Strategy Framework Directive, as well as co-chair the Working Group on Data, Information and Knowledge Exchange (WG DIKE) and the Technical Group on Marine Data and IT (TG Data) and coordinate the development of data products to be published in WISE-Marine. My background is on Environmental Sciences and I have worked as well in Spain in the implementation of different marine environment-related legislation, and participated in projects on maritime spatial planning, maritime security and marine pollution response.

EIONET Central Data Repository

You are here: Eionet » CDR

The Central Data Repository is part of the Reportnet architecture. The Central Data Repository is like a bookshelf, with data reports on the environment as submitted to international clients.

Each country either has a collection (📁) for its deliveries or a referral (👉) to a different preferred repository. The data reports within each country collection are arranged under the relevant reporting obligations or agreements.
