INSPIRE
HACKATHON
2018

Vision of INSPIRE Hack

Karel Charvat

Plan4all

Current situation

- Many projects is not able to guaranty long time sustenability
- Shortly (max. in few years) most of results are disappearing
- New projects are very often starting again from **level 0** and repeating the same mistake
- Data from previous projects are often not used again
- The different projects in the same domain are not cooperating

Objective 1.

- **Main focus is on sustainability of (not only) EU research**
 - Focus more on connection of different project teams and initiatives
 - Speed up project development
 - Transfer of results from past projects into new activities and also to potential businesses
 - Exchange data and tools among running projects
 - Support better utilization of results
 - Re use data and tools

INSPIRE Hackathon

- The INSPIRE Hackathon ensures continuity of open data integrations done in time limited efforts such as those in EU funded projects.
- The INSPIRE Hackathon contributes to capacity building and education of open data policy implementation and management

Objective 2 Linkage of INSPIRE, GEOSS, Copernicus with every day life

- We would like support implementation GEOSS, Copernicus and INSPIRE in Europe and World Wide and make them useful for every day life
- We would like connect experts and young people to build solution on the top of available infrastructure
- We would like join different projects activities to cooperate closely exchange results and experience to turn results into business
- We would like support incubation of some ideas

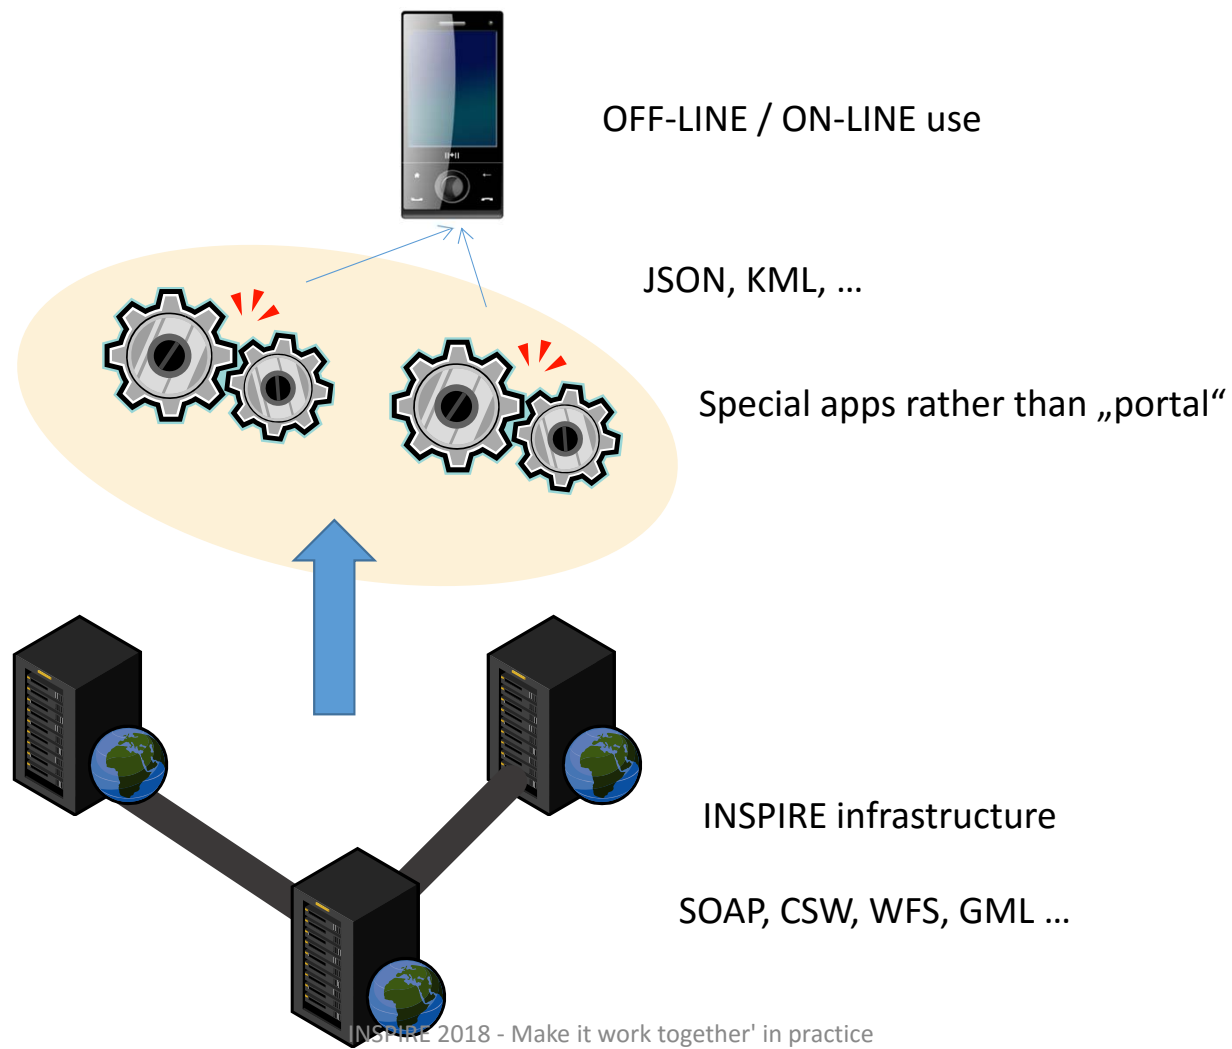

TWO WORLDS ?

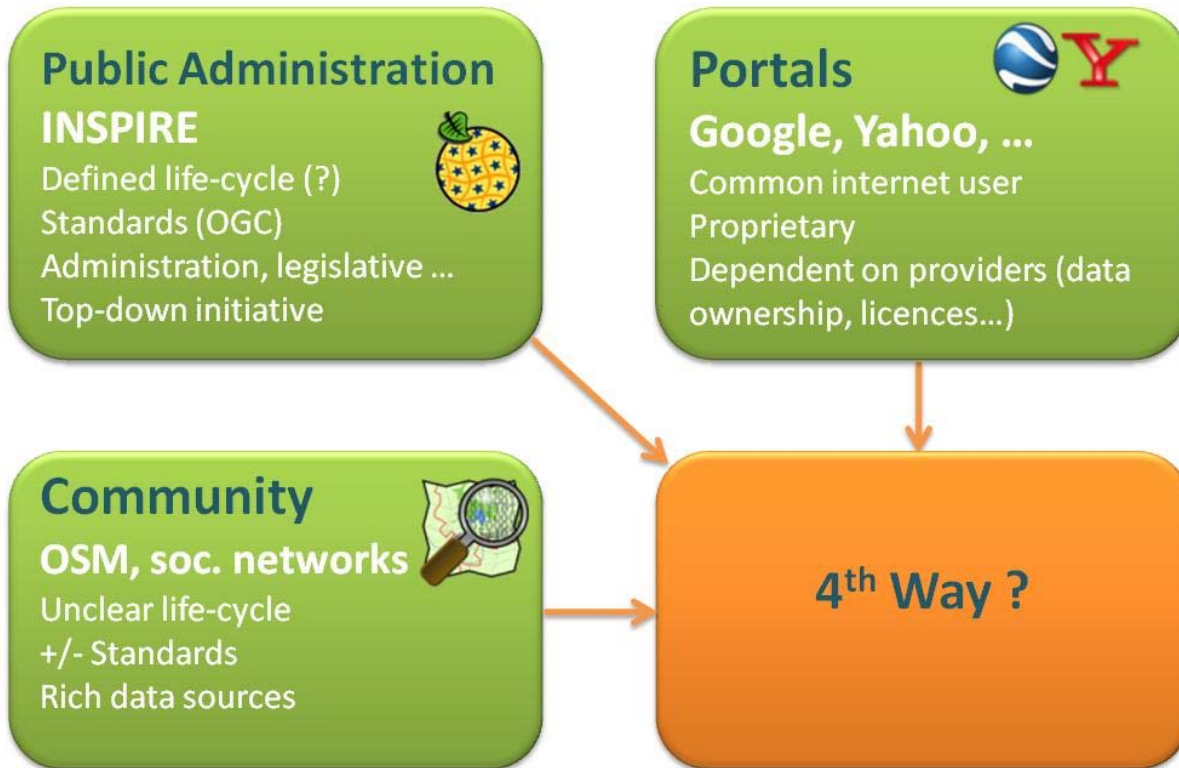

IDEAS

- INSPIRE is not commonly known
- *Heavy* formats (GML)
- For government ...

- INSPIRE data may be widely used
- Portal is not everything
- Need to have bridge (apps) making it accessible
- *Social* apps may contribute INSPIRE !
- Mobile technologies may help to disseminate

4th way concept

Objective 3 Support for Interoperability

- Without interoperability doesn't exist transferability of new Apps from one region to other
- It is limiting potential of new applications and possibility to transfer new interesting Apps from one region to other
- It is limiting grow of new SMEs to global scale
- We need not only discoverability of data, but also focus on semantic interopeability

Objective 4 To provide PR

- INSPIRE Hack is making PR for INSPIRE, GEOSS, Copernicus
- INSPIRE Hack is making PR for standards
- INSPIRE Hack is making PR for projects
- INSPIRE Hack is making PR for existing Data Sets
- **INSPIRE Hack is making PR for new ideas.**

Objective 5 Connect people

- The goal is connect people, who has similar ideas
- INSPIRE Hack is connecting people from projects
- INSPIRE Hack is connecting people cross boarder
- INSPIRE Hack is connecting people cross continent

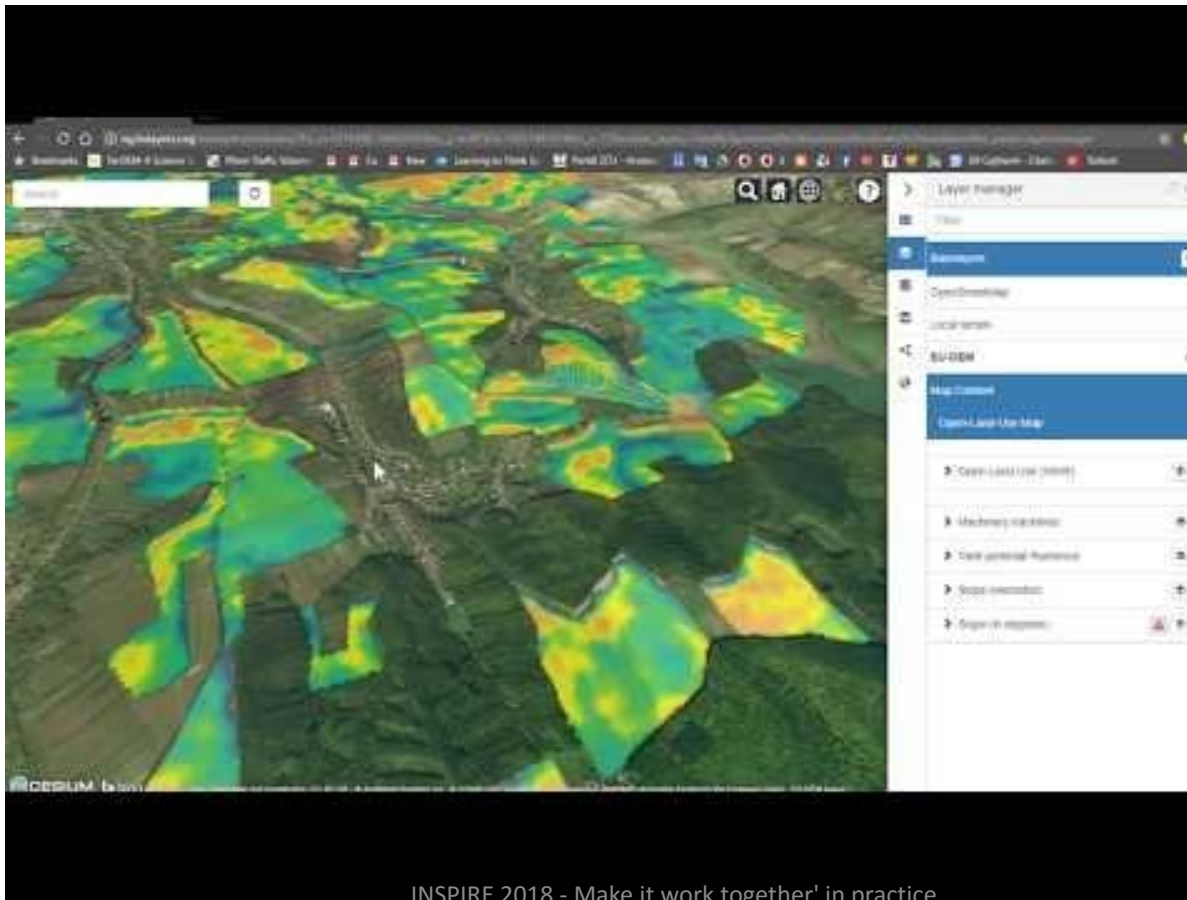

INSPIRE Hackathon

- INSPIRE Hackathon is not event
- INSPIRE Hackathon is process

INSPIRE Hackathon

- The INSPIRE Hackathon uses [INSPIRE](#) as its platform. From this platform a network of satellite hackathons are supported to grow the community in Europe and beyond. For the future evolution we foresee to be able to organise preparations before hackathon events (including coding) that might include input from problemathons, ideathons and datathons – as input and preparations for future INSPIRE hackathons.

INSPIRE Hacks are not limited on INSPIRE

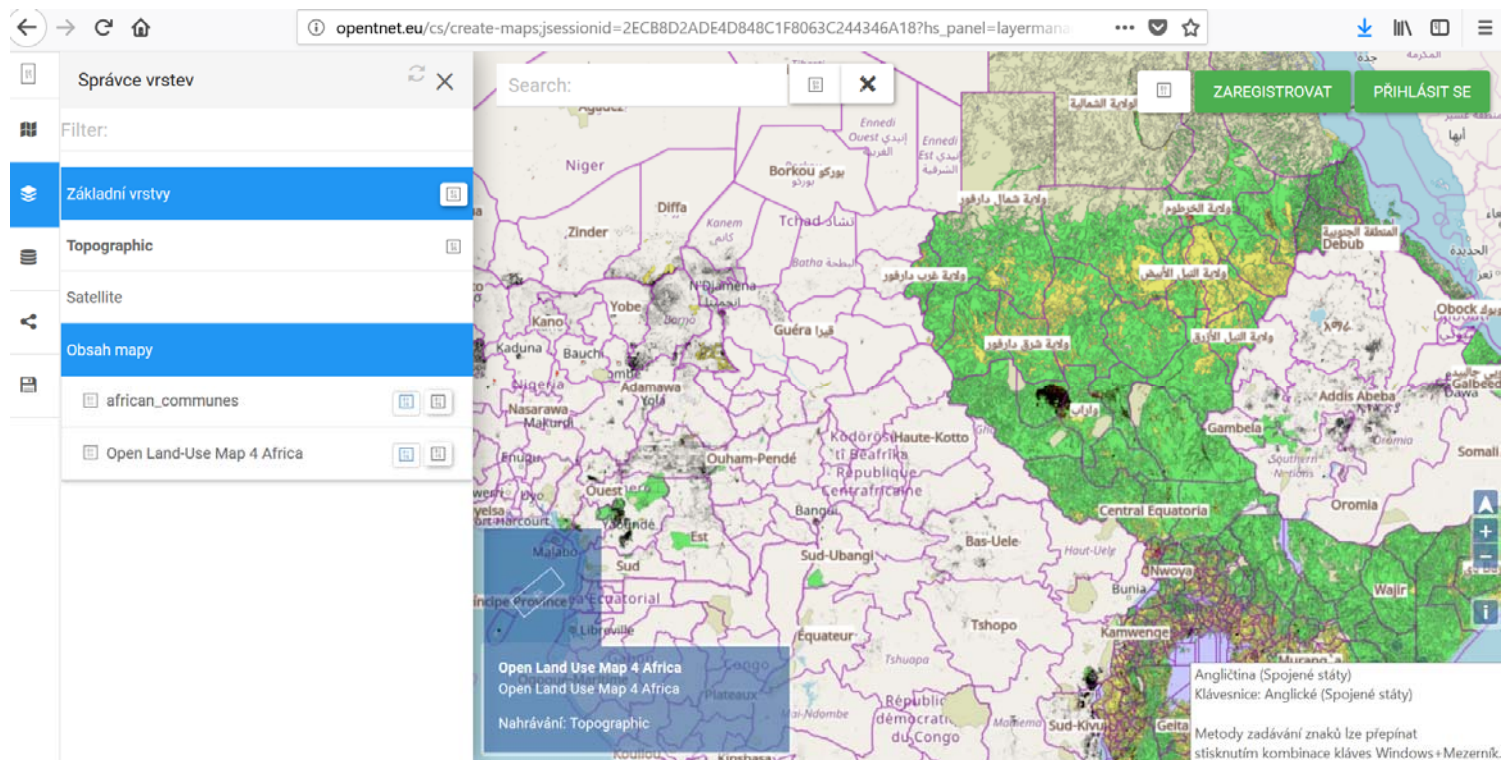

21.09.2018

INSPIRE 2018 - Make it work together! in practice

15

INSPIRE Hacks are not limited on Europe

<https://goo.gl/mWDvTb>

Whom we are looking for?

- Other projects
- Data providers
- API developers
- International network and organization
- Standardization bodies
- Organizers of events
- People for PR
- **Enthusiasts trying to developed something**

Thank you
