Compliance promotion exercise evaluation

- The implementation dialogue as part of the compliance promotion has proven very effective and was valued by COM and MS.
- The action plans show a common understanding and awareness of remaining issues and demonstrate the goodwill of Member States to address these.
- Country Fiches bring all information together in a comprehensive and comparable overview of the implementation status, issues and outlook.

The outcome of the compliance promotion exercise showed significant implementation progress since 2014. The Commission will provide feedback to Member States on this compliance promotion exercise after the country fiches have been published. Country fiches will be the basis for this feedback and will be further developed in an operational system.
