

Open Data, Volunteered Geographic Information and Citizen Observatories

<http://www.plan4all.eu/inspire-hack-2017/>

The INSPIRE Hack 2017 was finalised on Tuesday 5th September 2017 at the INSPIRE Conference 2017. We had in total 11 teams working on interesting projects using open data, volunteered geographic information and citizen observatories.

All 11 teams presented their results to the audience and to the jury. The jury members included:

- Karen Fullerton, Joint Research Centre of the European Commission, Digital Economy Unit, Italy
- Jitka Faugnerová, Czech Environmental Information Agency, Czech Republic
- Marie-Francoise Voidrot, Open Geospatial Consortium, France

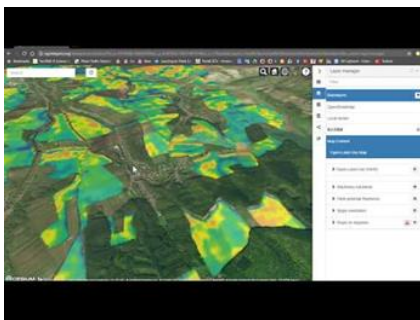

Each team was evaluated by the jury based on the following criteria:

1. INSPIRE, COPERNICUS and GEOSS relevance
2. Innovation
3. Environmental/societal value
4. Interoperability

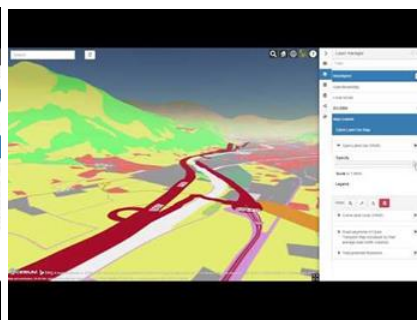

As a result the jury announced the three best teams/applications of the INSPIRE Hack 2017:

1. TEAM 4 - 3D Open Land Use (Leader: Karel Jedlicka/University of West Bohemia)
2. TEAM 8 - Geospatial User Feedback (Leader: Joan Masó/CREAF-UAB)
3. TEAM 5 - Linked Data Generation (Leader: Raul Palma/PSNC)

The first two videos show the winning application demo. The third link is to an interview of the organisers and the INSPIRE Hack 2017 winner.
